Frontend Developer | Software Development

Frontend Developer with a degree in Management Information Systems and a strong foundation in Java, Python, and OOP. Completed several web development training programs, most recently the Frontend Development Track at Route Academy, where I studied modern frontend technologies including React.js. Currently developing my skills in Vue.js, with a foundation in UI/UX design using Figma.

RELEVANT EXPERIENCE

National Telecommunication Institute (NTI) • 04/2026 - 06/2026
Web Design Trainee • Alexandria

Completed 120+ hours of training, during which I developed and implemented 10+ responsive web projects using HTML5, CSS3, JavaScript, Bootstrap, and jQuery. Gained hands-on experience working with APIs and applying Object-Oriented Programming concepts, form validation, and regular expressions through practical web application development.

EFE
Web Development Trainee • online

Completed 90+ hours of training, gaining practical experience in Python and C# programming, along with Git and GitHub for version control and collaborative development. The training also provided hands-on exposure to backend fundamentals, including SQL and databases, giving me a broader understanding of web development beyond the front end.

CIB • 07/2022 - 08/2022
Summer Intern

Completed a summer internship at CIB, gaining exposure to the banking industry and its departments, along with an introduction to data analytics, Artificial Intelligence, and Information Technology. Developed a broader understanding of how technology and data support business operations within the banking sector.

EDUCATION

B.Sc. in Management Information Systems (MIS)
Alexandria University • Alexandria • GPA: 3.1 — Very good • 01/2020 - 01/2024

Zizania Secondary School • Alexandria • GPA: 92.3% • 01/2017 - 01/2020

PROJECTS

Ancient Egypt

Technologies: HTML5, CSS3, JavaScript, Three.js, GSAP

Developing an interactive website focused on Ancient Egyptian civilization, allowing users to explore the history and stories of Egyptian kings and queens, discover the locations of their statues, and find museums and historical sites related to their history.

Weather Web App

Technologies: HTML5, CSS3, JavaScript, Bootstrap, REST APIs

Developed a responsive weather application that retrieves and displays 10-day forecasts for selected cities, with dynamic backgrounds that change based on weather conditions and whether it is day or night.

Game Review Website

Technologies: HTML5, CSS3, JavaScript, Bootstrap, REST APIs

Developed a responsive game review website that retrieves game data from an external API. Designed a distinct visual interface for each page based on the game category, including customized backgrounds, colors, and visual elements to create a unique experience for each type of game.

Graduation Project—EPROM Petroleum Company

Technologies: HTML5, CSS3, JavaScript, TypeScript, Next.js, Tailwind CSS, MySQL

Developed and contributed to the front end and back end of a web and mobile application designed to streamline internship registration and management for EPROM trainees. The system supports trainee registration, course management, application approval, payment tracking, certificates, and administrative reporting.

SKILLS

Technical Skills: HTML5, CSS3, JavaScript (ES6), Bootstrap, jQuery, Vue.js, React.js, API Integration, Git & GitHub, Three.js, GSAP, Next.js, TypeScript, Tailwind CSS, OOP, Java, Python, MySQL, Figma, WordPress

Languages: Arabic: Native, English B1-B2
